

WORKING WITH US IS A SNAP!

xXtreme

xXtreme is a high-design tile & frame system to strongly compete with Steelcase Answer®, Herman Miller Ethospace®, and more. Tiles may be designed in fabric, laminate, glass, metal, whiteboard and more. Note: The xXtreme system can be configured from low-service 30" height panels to full floor-to-ceiling enclosed offices and conferencing zones.

Mirage & Mirage VS

Mirage and Mirage VS panel systems are based on monolithic panels that compete for value conscience office workstation applications. Panels may be configured in fabric, laminate and glass. Note: Mirage has a clean metal flush base with a vast array of finishes and colorways. VS is based on the original OEM plastic base and the line offers a limited number of colorways to target a value series environment.
